- Unique and replaceable heavy duty 3-D cut ear pads
- New soft cushioned genuine leather headband
- Pre-selected transducers
- Individually tested and numbered
- Made in Austria

K 702

These superlative K 702 open-back dynamic headphones provide an outstandingly accurate sound and excellent imaging.
Whether you prefer the holistic approach or like to listen analytically, the K 702 from AKG will turn perception into pure enjoyment.

Experience pure perfection!

AKG is the first manufacturer in the world to use the revolutionary flat-wire technology in headphones. The result is a truly dramatic sound that places every musician at their correct location with pinpoint accuracy. This kind of agility, spaciousness, brilliant highs and velvety, punchy bass is simply miraculous. Pre-selected transducers guarantee minimum channel tolerances as requested for professional audio applications.

AKG also improved the cushioned genuine leather headband which increases the comfort and let you enjoy your K 702 for hours.

Furthermore high complex manufacturing processes were applied to let the K 702 appear in their delicate but robust finish.
Finally each K 702 with attached cable is tested individually at the end of the production line to meet our costumers highest quality requirements.

Using advanced technologies is not an end in itself but a way to make music come to life.
The K 702 is the result of more than sixty years of research and development devoted to creating the perfect headphones.

The Austrian-built K 702 is backed by a two-year parts and labour warranty from AKG.

AKG SOUNDS BETTER
